

NAMPO 2018

Bothaville, South Africa

15 – 18 May 2018

Booth B13a

Trelleborg Will Showcase a Range of Agricultural Tires at NAMPO Harvest Day 2018

Trelleborg will present its wide range of agricultural tires at NAMPO 2018, one of the leading agricultural trade shows held in Bothaville, South Africa, from May 15 to May 18 at pavilion B13A.

Gustavo Pinto, Regional Director Africa & Middle East, Trelleborg Wheel Systems, says: “NAMPO Harvest Day is considered as the heartbeat of agriculture in South Africa. It offers manufacturers like Trelleborg, a unique platform to network with the top players in the agricultural industry, strengthen relationships and enjoy all that NAMPO offers.

“At NAMPO, Trelleborg will demonstrate to farming professionals its best-in-class solutions that decrease the use of natural resources and overall environmental footprint, while maximizing efficiency and productivity of their operations.”

Taking center stage on the stand are some of Trelleborg’s popular products, including:

The **TM1000 High Power** tire, which is able to transfer the entire tractor’s engine power to the ground, reducing working time and the cost of farming operations. It has been engineered to maximize the efficiency of the latest generation of transmissions.

The **TM600** tire has been developed for multipurpose machines to operate both in the field and on the road. Today’s tractors are increasingly used on the road, frequently moving from one field to another, often carrying equipment or towing trailers. It ensures low soil compaction and high flotation performance, protecting the soil and improving crop fertility.

The **TM700** tire is well known for its great performance and advanced technology that ensures excellent traction and low slippage for minimum energy loss with maximum power transmission to the ground.

Twin Radial tires from Trelleborg have a unique tread design that provides high flotation and low compaction, engineered for the latest generation of trailers. The **T404** is ideal for soft terrain and the **TM90** is an all-round bias solution for standard tractors.

Also at Trelleborg’s pavilion, visitors will be able to face the challenges of modern agriculture by playing the “Farming Simulator 17” video game for which Trelleborg is the official agricultural tire

partner. In addition, there will be a shop on stand where visitors can purchase Trelleborg and Mitas branded goods.
