Trelleborg's TM1000 ProgressiveTraction® Nominated Best Agricultural Tire for 2020 by NMR Magazine

The TM1000 ProgressiveTraction® tire from Trelleborg Wheel Systems has been nominated “Best Agricultural Tire for 2020” by the Spanish magazine, “NMR – Neumáticos y Mecánica Rápida”, which specializes in tires and is geared towards professionals in the sector.

Seventy-nine candidates in eight categories are contenders in this contest that awards outstanding achievements in key sectors. With this nomination, the TM1000 ProgressiveTraction® is being recognized for its superior technology and performance as well as its contribution to the agricultural sector in terms of innovation, performance and reduced environmental impact.

The highly successful, multi-award-winning ProgressiveTraction® technology releases additional power to the ground and reduces stress on the soil while boosting the machine's performance on the road.

Ramon Martinez, Country Manager Spain and Portugal, says: “We are proud to receive this nomination, which is a testament to the efforts of our R&D, commercial and marketing departments.”

The ProgressiveTraction® tread was designed to meet the requirements of the latest generation of machinery, increasing power transmission efficiency to the ground while reducing soil compaction. At the same time, the double-edge-lug tread design was developed to reduce vibration, lowering energy dissipation, minimizing fuel consumption and at the same time extending service life. In fact, tests show that ProgressiveTraction® reduces fuel consumption by up to 3% and extends tire service life by up to 5%.

Voting for the Best Tire of 2020 has already begun online and more information can be found <http://www.posventa.com/es/notices/2020/04/premios-neumatico-del-ano-2020-ya-puedes-votar-a-tus-candidatos-59501.php#.Xo7IY-R7IPY>.
