

Innovation from the Soil Up: Trelleborg Tires driving superior performance at Farm Progress Show 2025

- At Farm Progress Show 2025 (Booth 612), Trelleborg Tires brings its latest innovative agricultural tires engineered to enhance productivity, preserve soil health, and meet the evolving demands of modern farming
- Trelleborg tire experts are on-site to guide agri professionals through tire solutions that deliver unmatched traction, durability, and efficiency, helping them succeed season after season

Trelleborg Tires will showcase its latest agricultural tire innovations at **Farm Progress Show 2025**, the nation's largest outdoor farm event, held in Decatur, Illinois, from August 26 to 28. Visitors can discover the newest solutions for unmatched productivity and soil protection at **booth 612**.

Designed to meet the evolving needs of modern agriculture, **Trelleborg tires** deliver *superior traction and tire life for unmatched productivity*. Consistently with the entire Trelleborg agricultural range, every tire is developed through advanced engineering to maximize efficiency, protect the soil, and withstand even the most demanding field and road conditions.

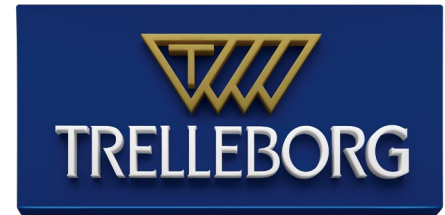

"With Trelleborg tires, we bring innovation from the soil up, helping agri professionals go further, do more, and do it better." said Andrea Masella, Marketing Director Agriculture North America. *"Our solutions are not just designed to carry loads: they actively enhance performance, protect the land, and deliver value where it matters most: in our customers' fields."*

On display will be tire solutions developed to meet the challenges of modern agriculture, combining superior traction, durability, and efficiency, including:

- **TM3000 CFO (Cyclic Field Operations), VF 850/45R26** – Making its live debut in this latest size, the TM3000 CFO is engineered specifically for modern spreader machines. Offering increased load capacity, superior flotation, and exceptional traction thanks to **ProgressiveTraction® technology**, it ensures soil protection and durability in the most demanding operations.
- **TM3000, VF 750/60R46** – Another new size unveiled for the first time, designed for spreader applications where stability, precision, and control are essential. The tire is proudly manufactured in USA and it is also offered as a complete assembly with Trelleborg TW25x46 wheel designed to meet all OE specifications.

Press Release

- **TM1 ECO POWER** – Winner of the **2025 AE50 Award** by the American Society of Agricultural and Biological Engineers (ASABE), this tire combines performance and sustainability, reducing environmental impact without compromising efficiency.
- **TM1000 ProgressiveTraction®** – Multi-award-winning tire developed for the most advanced machinery, delivering unbeatable traction, excellent flotation to reduce soil compaction, low fuel consumption, premium handling, and extended tire life both in the field and on the road.

Attendees will also have the opportunity to meet **Trelleborg agricultural tire specialists** to discuss their specific needs. *“Farm Progress Show is the perfect place to connect with agri professionals and show how Trelleborg Tires turn innovation from the soil up into real benefits — helping them boost performance, optimize efficiency, and count on their equipment to succeed season after season, in every field.”*
