

Trelleborg's EMR 1051 Awarded Off-the-Road Tire of the Year at Hevea Awards

Trelleborg's EMR 1051 tire has been awarded the 2021 Hevea award in the Best OTR (Off-the-Road) Tire Category, during the closing gala for the awards organized by Europneus, at the Ifema fairgrounds in Madrid, Spain.

Designed specifically for wheel loaders, the EMR 1051 tire received almost 30% of the votes from the public and judges, confirming Trelleborg's second win in these prestigious awards, following the win in the Best Agricultural Tire Category with the TM1000 ProgressiveTraction® in 2019.

Ramón Martínez, Country Manager Spain and Portugal at Trelleborg Wheel Systems, says: "We are proud to once again receive a Hevea award, this time in the OTR category. We really feel this award recognizes the excellence of our products and the continuous effort we invest in the research and innovation for all our products. This recognition of our EMR range underlines Trelleborg's commitment to the construction sector, which requires high quality solutions and high expertise, both of which our customers have come to expect."

Trelleborg's EMR 1051 tire was specifically created for loaders operating in demanding environments. Engineered using a state-of-the-art compound and boasting a strong radial carcass and extra-deep tread, the earth-moving radial tire EMR 1051 optimizes load distribution and tire life while boosting ride comfort and fuel efficiency. Designed for heavy loads, it is a prime solution for working on intensive construction jobs, including in open pits and quarries. The EMR 1051 range consists of four sizes: 20.5R25; 23.5R25; 26.5R25 and 29.5R25.
